

Midlands Area Adult Leagues – Support – 2021-2022

Hopefully you've been able to have club members attending GMS training and you have access to the new Regulations and are aware of the requirements for your various roles. I'm in the process of setting up a team to provide you with support and answer any questions you may have. Until complete there is a very good FAQ here:

<https://www.englishockey.co.uk/competitions-and-events/game-management-system>

But I know the personal touch is important, so, here's who to go too:

ALDS (Adult League Divisional Secretary)

As previous years you should contact the Divisional Secretary that look after the division for the team that needs clarification. Currently the Divisional Secretaries are in the process of becoming familiar with the changes themselves and will be in touch with each of the captains as soon as they can. In the meantime, either use the FAQ or direct queries to me.

GMS Managers

With the inclusion of a new system, it was identified there would be a need for a role(s) within the League Committee for direct support of the GMS (Game Management System). To provide this in the Midlands, we are appointing three GMS Managers. Here they are and the areas for which they be focused, to give you as much support as possible. Although an EH Support desk will be available and should be used with any problems with logging on, I think it's important that we can give you speedy targeted support and we understand your problems so we can feedback to EH for changes and future developments.

General Technical support, but not logging on, and interface to EH for developments and changes.

Michael Hooper, mhooper16@aol.com. Michael was the developer and webmaster of the Midlands Men's League website.
